Mapping the right professional, to the right project.

Contract Engineering is more than a specialized division at Amtec Human Capital. It is our core strength, and the foundation upon which we built our company.

Since 1959, Amtec's engineering-focused talent experts have been successfully mapping and matching qualified engineering, manufacturing and research & development professionals to companies representing a broad range of industries. In that time, we've come to understand the engineering, manufacturing and design disciplines for which we recruit as expertly as the professionals we place, and as well as the companies we serve.

Meeting your requirements, and project demands.

Turn to Amtec's Contract Engineering Division for your staffing needs, and your inbox won't get flooded with resumes. Instead, we deliver only expertly selected, top-tier candidates with exactly the right combination of technical competencies and soft skills to meet the project's workload, milestones and demands.

Discover why Amtec's Contract Engineering Division offers one of the industry's highest submit-to-interview (S2I) and interview-to-hire ratios (I2H), as well as long-lasting relationships with our engineering, manufacturing and R&D clients.

• Your HR Extension

Amtec's Contract Engineering Division serves as an extension of your Human Resources team. Whether you're looking to augment your workforce or acquire specialized knowledge, our engineering recruiters will work closely with you to quickly and cost-effectively deliver candidates that support the success of your project.

• On Time, On Budget

We understand the critical importance of keeping your projects running on time, and within budget. Regardless of the size, scope or length of your project, we will find professionals who contribute directly to your success.

Mapping the right professional, to the right project.

- **Understanding Your Requirements**

Our recruiters offer a long and proven track record in mapping our clients' requirements and culture and uncovering the available talent in the market. Beyond the latest

terminology, we offer in-depth understanding of the disciplines for which we recruit, as well as our clients' technology, processes and products. Leveraging this insight, we expertly select people with the competencies you require to meet your objectives.

- **Precision Mapping**

Our Human Capital Mapping™ model is the industry's most thorough, comprehensive and accurate profiling and qualification process. Searching well beyond key words and job titles, we find and deliver only those top most-qualified candidates who meet your precise technical requirements, fit well with the project's needs and team, and complement your company's culture.

- **Thorough Screening**

Our recruiters thoroughly screen and interview each and every candidate we present. We obtain reliable and relevant references from previous supervisors. We stand behind our professionals and qualify their character, as well as their competencies.

- **Time to Productivity**

Our Human Capital Mapping™ process includes our proprietary Performance Acceleration Tool (PAT), designed to get the candidates you've selected ramped up and productive as rapidly and efficiently as possible.

- **Cost-Effective Contract-to-Hire**

As a result of the quality and accuracy of our Human Capital Mapping™ process, many of our clients have chosen to hire the professionals we deliver following a trial period. Working closely with Amtec's Direct Hire Division, we can also help you quickly and cost-effectively transition a contract professional to a regular full-time position.

Contact Amtec's Contract Engineering Division for your next project's needs. We'll respond quickly, accurately and efficiently with the right professional for your project, and your success.
